CAN AI DO THIS?

Enable
EDUCATION

How can we use AI to completely revolutionize the way we do learning?

✅ AI can can generate and curate content around broad topics.

❌ AI does not understand how people are motivated or how they enjoy learning.

Opportunity to Rethink Learning

The limitations of AI present us with a rare opportunity to really rethink learning and training.

HOW?

Look for ways for learners to interact with new learning material at higher levels of Bloom's Taxonomy, such as analyzing, evaluating, and creating.
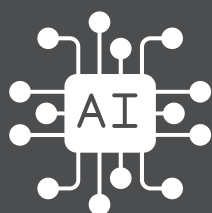

Promote Critical Thinking

- Critical thinking involves analyzing information to determine its validity, relevance, and reliability.
- Learning built on critical thinking is exploratory and leads employees to own their professional development.

Use AI

AI

- Allow learners to use the tools they have available to them.
- Use AI for tasks that AI is good at.
- Banning AI would be self-defeating: We didn't ban the calculator, but we did teach people to use it effectively!

Assess Performance

- Assess performance Instead of just learner knowledge about a topic.
- Performance assessments help determine competency and identify skills gaps.

HOW?

Gamification
Incorporate game-based learning in training as a vehicle for valuable learning opportunities.

Training Videos
Capture knowledge of your subject matter experts to incorporate into training.

Online Learning
Take your face-to-face training online to broaden your reach.

Learning Experience Design
Plot out entire learning paths that are tailored to your employees' needs.

Who We Are

Enable Education works with companies to elevate and implement effective workplace learning experiences. Together we design tools and experiences that bridge the gap between learning and doing.
